

memo for Record  
Subject: Project 8003

17 January 1980

SG1H

P Discussion today with Capt Don Woffolk, SOD. Informed him it was having difficulty obtaining adequate ops data from IIID, ITAC due to priority nature of other work that organization is doing [redacted] targeting packages re (project 8003). He told me he would call Mr. Richard, IIID, and ask him to make one additional copy of all aerial photography being included in the target packages. Capt Woffolk subsequently told me he had reached Mr. Richard by phone, and that he would do so.

P Capt Woffolk stated that Mr. Richard was scheduled to visit SOD on 28 January 1980 to discuss (8003). I indicated a need to speak with Mr. Richard and participate in all discussions. Capt Woffolk said I may participate, particularly since Mr. Richard would be transporting the

Hammer targeting packages (and my extra photo copies) and would probably be over to give guidance and specific EEL re Project 8003 targets.

A Capt Wolfolk assisted me in identifying stock numbers of 1:50,000 maps regarding several target cities relevant to 8003. Capt. Wolfolk stated he was going to the Pentagon on 18 January 1960 and would be willing to pick up copies of maps for me. In fact, he was interested in getting his own copies of the maps.
